INTRODUCTION

With the rising cost of machinery and the uncertainty of local workers, custom agricultural work has become a staple for today's farm. This publication reports the average rates for Kansas agricultural custom work in 2018. Previous versions of this survey and report were written and conducted by the National Agricultural Statistics Service-Kansas office (NASS). Since 2016, the survey has been conducted by the Land Use Survey Program (LUSP)¹ in the Department of Agricultural Economics at Kansas State University in conjunction with the Kansas Department of Agriculture (KDA). In 2018, the survey was available online to Kansas custom operators across state.

KDA and the LUSP extend a special thanks to Kansas farmers, ranchers, custom operators, co-ops, and elevators for their responses to the 2018 Kansas Farm Custom Rates Survey. We have received many comments about the Custom Rates report from the agricultural community. We appreciate this feedback and encourage readers to continue sharing their ideas and suggestions regarding this survey.

The data in this report provide additional information to Kansas farmers, ranchers, and custom service businesses for decision-making. The prices reported here should not be regarded as official or established rates. The average figures in this report give equal weight to all responses received.

The prices in this report include charges for machinery, power, fuel, and the operator. These prices do not include the costs of chemicals, seeds, and other materials unless otherwise specified. The one exception is hay baling materials. Exchange work between farmers is not considered custom work for the purposes of this report.

There are large variations in the rates charged for specific jobs. For many items, the state averages may not be typical of any particular locale. There are many reasons for price differences. Some farmers may charge lower prices to neighbors, relatives, or close friends. Soil conditions and field sizes are also significant factors. The number of responses may also lead to variation in the rates.

This report contains historical tables and graphs that show the results of previous surveys. Some responses are included in more than one district because custom work was performed in multiple districts. For the purpose of this report, Kansas is classified into three regions: western region, central region, and eastern region, as shown below.

¹The Land Use Survey Program (LUSP) was formerly known and referenced in previous publications as the Land Use Survey Center (LUSC).

GRAIN HARVESTING

WHEAT: Two methods are commonly used to charge for harvesting grains: a flat rate charge and a base rate with extra charge for high yield. Custom harvesters charged an average base rate of \$22.66 per acre for harvesting wheat in 2018, \$0.51 lower than 2016. In 2018, harvesters charged an average of \$0.227 extra per bushel of wheat for yields greater than 24 bushels per acre. The reported range was larger in 2018 than in 2016. The average flat rate in 2018 for harvesting wheat was \$25.22 per acre, an increase of \$0.55 from \$24.67 per acre in 2016.

GRAIN HARVESTING (Continued)

GRAIN SORGHUM: Custom harvesters charged an average of \$23.55 per acre for harvesting grain sorghum in 2018, \$0.84 lower than 2016. Frequently, harvesters include an additional charge per bushel to customers with high yields. In 2018 the extra charge was averaged \$0.226 per bushel of grain sorghum for yields greater than 48 bushels per acre. The 2018 flat rate charge per acre was \$26.10, up \$0.43 from 2016.

CORN: Custom harvesters charged an average of \$29.40 per acre for harvesting corn in 2018, up \$2.51 from 2016 but \$0.62 lower than 2013. The average additional charge to customers with high yields was \$0.217 per bushel of corn for yields greater than 77 bushels per acre; both the charge and high yield were smaller than the 2016 numbers. The 2018 flat rate charge was 32 cents per bushel and \$32.39 per acre.

SEED CLEANING

Rates for seed cleaning are higher with treatment than without treatment. Wheat seed cleaning with treatment averaged \$2.55 per bushel, a decrease of \$0.62 from 2016. Rates for cleaning wheat without treatment averaged \$1.10 per bushel, 42 cents higher than in 2016. The average cost of cleaning other seeds in 2018 was not reported here because of small number of responses received.

GRAIN HAULING

Rates for hauling grains from the field to the farm or to the nearest elevator in 2018 were lower, with a shorter maximum distance, and higher extra charge, compared to the rates in 2016. The average base rate charged for hauling wheat, grain sorghum, corn, and soybeans was 18.7 cents per bushel, with an extra charge of 6.4 cents per bushel per mile over 18 miles. The 2016 average custom rates were 20.2 cents per bushel plus 5.4 cents per bushel per mile over 28 miles. The average rate for hauling sunflower was \$0.216 per bushel, down \$0.138 from 2016.

SILAGE OPERATIONS

Custom rates for silage operations were separated into four categories: 1) chopping, hauling, and filling the silo, 2) chopping and hauling, 3) chopping only, and 4) hauling only. The average rate per ton for the complete silage operation was \$11.56 per ton, up from \$8.83 in 2016. Operations which included only chopping and hauling averaged \$8.48 per ton, down \$0.66 from 2016. Chopping averaged \$5.77 per ton, down \$1.39 from 2016, and hauling averaged \$2.14 per ton, down \$1.27 from 2016.

HAYING

The average custom rate for mowing or swathing hay was \$13.98 per acre in 2018, up \$0.23 from 2016. The rate for mowing or swathing forage was slightly higher than hay, averaging \$14.50 per acre, down \$1.02 from 2016. Mowing or swathing with conditioning averaged \$14.10 per acre in 2018, compared to \$13.46 in 2016. The charge for side raking averaged \$4.53 per acre, down 12 cents from 2016.

HAYING (Continued)

The custom rates for baling small square bales in 2018 were higher than the 2016 averages and around the 2013 averages. Custom baling of small square bales with wire cost an average of \$1.16 per bale, while baling with twine averaged \$1.26 per bale in 2018. Large round bales weighing less than 1500 pounds, without net wrapping, cost an average of \$11.86 per bale; bales of the same size with net wrapping cost an average of \$12.15 per bale. Large round bales weighing over 1500 pounds without net wrapping cost an average of \$11.50 per bale; wrapped bales of the same size cost an average of \$12.39 per bale. The charge for large square bales weighing about one ton averaged \$13.29 per bale, down \$1.09 from 2016.

HAYING (Continued)

Custom rates for hauling small bales from the field to farm storage averaged 83 cents per bale in 2018, down 10 cents from 2016. The cost of hauling large square bales averaged of \$3.38 per bale in 2018. Rates for hauling large round bales averaged \$3.84 per bale or \$5.50 per ton in 2018. There were too few reports for hay stacking to provide a reasonable indication of current rates; therefore, the table has been removed.

LAND TILLAGE

Custom rates for tillage operations vary depending on many factors, including location, type of soil tillage practice, size of fields, and the size of equipment. The average charge for disking (including one-way disking), was \$11.85 per acre in 2018, down \$0.35 from 2016. The average offset disking charge of \$13.25 per acre in 2018 was up \$0.65 from the 2016 rate. Tandem disking averaged \$11.70 per acre in 2018.

^{1/} Insufficient number of reports. Disking and One-Way Disking were combined beginning in 2009. Subsoiler/In-line ripper, Strip Tillage and Vertical Tillage were added from the 2016 Survey. Finisher and Rotary Hoe were added from the 2018 Survey.

PLANTING

Regular-Till

As suggested by respondents, custom rates for planting crops were separated into four categories in 2018: planting without fertilizer & chemical application, planting with only fertilizer application, planting with only chemical application, and planting with fertilizer & chemical application. Planting rates for the latter two categories were not reported here because the number of responses was too small.

Small grain seeding charges without fertilizer and chemical application in 2018 averaged \$14.25 per acre. Charges for planting grain sorghum averaged \$15.49 per acre in 2018. The average price charged for row planting corn was \$15.59 per acre. Soybean planting charges averaged \$16.78 per acre for row planting, \$16.25 for drilling, and \$20.00 for twin-row planting in 2018.

PLANTING (Continued)

Minimum-Till or No-Till

Over time the custom rates for minimum-till planting of crops have been on the rise. The custom charges for minimum-till or no-till planting small grains, grain sorghum, corn, and soybeans in 2018 were higher than the corresponding 2016 rates. The custom rate for minimum-till or no-till drilling of small grains averaged \$16.03 per acre in 2018, up \$0.54 from 2016. Minimum-till grain sorghum planting averaged \$16.64 per acre, an increase of 4 cents from 2016. Corn planting in 2018 averaged \$17.12 per acre, an increase of \$0.33 from 2016. Soybean planting averaged \$17.25 per acre, up \$1.19 from 2016's average of \$16.06 per acre.

CHEMICAL APPLICATIONS

The custom rates for chemical applications presented here include the cost of machine, power, and the operator; however, the costs of the chemicals are excluded. Rates charged for row crop cultivation with fertilizer application averaged \$12.02 per acre in 2018, an increase of \$2.62 from the 2016 average. The average rate for row crop cultivation without fertilizer application in 2018 was \$10.51 per acre, an increase of \$2.24 from 2016.

Custom Rates for Row Crop Cultivation, 2018, by Region

Region	With Fertilizer Application (\$/Acre)			Without Fertilizer Application (\$/Acre)

FEED PREPARATION

Rates for custom feed preparations are those generally charged by grain elevators and feed mills. For grinding grain, the average custom rate in 2018 was 44 cents per hundredweight (cwt), down 3 cents from 2016; while the average rate for rolling grain in 2018 was 47 cents per cwt, an increase of 2 cents from 2016. Too few reports were available for the custom rates of grinding hay to be published. Mixing operations cost an average of 42 cents per cwt in 2018, compared to 34 cents per cwt in 2016. The average rates for rolling and mixing and for grinding and mixing in 2018 were 88 cents per cwt and 64 cents per cwt, respectively, compared with 77 cents per cwt and \$1.03 per cwt in 2016.

FEED DELIVERY

Various methods were used to charge for bulk feed deliveries. Rates for the most commonly reported methods are presented. If feed delivery was charged per load plus mileage, the rate in 2018 averaged \$33.33 per load plus \$2.00 per loaded mile for an average load of 16 tons. If the feed delivery charge was based on a straight charge per mile, the average rate in 2018 was \$2.98 per loaded mile on an average load of 9.45 tons. In 2016, operators charged \$2.11 per loaded mile on an average load of 9.72 tons. Operators also had fee structures with a flat rate per load for feed delivery. For an average load of 8.60 tons, an average flat rate of \$27.67 per load was charged in 2018. Some operators charged an additional fee for miles beyond a specified limit. For all methods, the average extra charge was \$2.17 per mile per load after 22 miles. In 2016, the average extra charge was \$2.92 per mile per load after 28 miles.

MACHINERY RENTAL

Rental costs listed below do not include the cost of fuel or labor for self-propelled equipment and tractors. Tractors and combines were the most commonly reported rental items, followed by corn headers, no till drill, anhydrous applicators, and disks. Some items, such as liquid fertilizer application and chemical sprayer, were reported but had too few reports to summarize.

Combine rental averaged \$213.33 per hour. Rental charges for corn headers in 2018 averaged \$11.00 per acre, down \$1 from 2016. Average rental for a no till drill was \$8.58 per acre in 2018, up \$0.37 from 2016. Rental for tractors with less than 100HP averaged \$21.68 per hour in 2018; while rental for tractors more than 250HP averaged \$78 per hour. Average rental costs show increases or decreases due to the varied demand and increasing costs of implements. Some of the variation may be due to the small number of reports for some rental items.

Machine Rental Rates, 2018

Machine or Tool	Method of Charge	No. of Reports	Range	Average
Combine	\$/Hour	21	100.00-260.00	213.33

HAULING LIVESTOCK

Questions related to custom rates for hauling livestock were added to the survey starting in 2016. Custom rates for hauling livestock with a belly-semi truck in 2018 averaged \$3.84 per mile hauled at 51,577 lbs. capacity. In 2016, average rate for hauling livestock with a belly-semi was \$3.23 per mile with 57,364 lbs. capacity. In 2018, custom rates for hauling cattle in flat trucks averaged \$5.75 per mile, with average capacity of 45,200 lbs.

FENCE BUILDING

Rates for fence building were reported in the Bluestem Pasture Survey report published in June of 2017. The 2017 average fence building costs computed from responses in the 14 Flint Hills counties. The reported rates varied considerably due to the difference in materials, equipment, and terrain. The rate charged for building a five-wire fence, excluding materials, averaged \$20.08 per rod in 2017, an increase of \$4.17 from 2015. The rate including materials averaged \$31.01 per rod, down 7 cents from 2015. Average hourly rates charged for fence building in 2017 were \$66.67 per hour with equipment, down \$10 per hour from 2015. In 2017, additional charge for gates was \$100.25 and for corners was \$166.67. Hourly rate for rough or rocky terrain averaged \$62.50 per hour, up \$7.50 from 2015.

Custom Rates for Fence Building, 2017

Type	2017 (\$)
5 Wire Including Materials (\$/Rod)	31.01
5 Wire Excluding Materials (\$/Rod)	20.08
Additional Charge for Gates (\$)	100.25
Additional Charge for Corners (\$)	166.67
Average Hourly Rate with Equipment (\$/hour)	66.67
Average Hourly Rate for Rough or Rocky Terrain (\$/hour)	62.50
